Human impact on the environment is increasing, as the modern world development is endangering our nature and surroundings. This is why, in recent years, the focus on environmental protection is growing globally, which is shown through the efforts to establish the principles of sustainable development worldwide. Accordingly, one of the main means of accomplishing this goal is environmental education for sustainable development and awareness raising; education is an important tool that promotes not only the gaining of knowledge, but also the formation of needed skills.

The presented work, that has been prepared on the basis of reviews and analysis of important publications, documents, and other relevant sources related to environmental education and education for sustainable development, mainly focuses on the role of Georgia at the international level, the efforts it has made and the existing situation in the country in the field of environmental education. The work provides a brief overview of the evolution of environmental education and provides its analysis based on major events which were held in Georgia and worldwide. The work emphasizes the importance of the role of environmental education in the development of environmental protection sphere and the complex issue of human co-existence with nature, and the efforts of Georgia has been done.
