TSU 3rd building, Tbilisi, 0179, Georgia;

In frames of scientific problems of discovery of alien civilizations noteworthy is a very complex problem which regards the various obscure phenomena or examples existing on the Earth. Those phenomena are beyond our experience and imagination. Today nobody can explain the origin of several famous megalithic structures from the aspect of technology of their purpose and creation. It is a very positive fact that from time to time there appear those people who propose a new approach to the interpretation of secrets of those objects. It seems that a man will never stop in his attempts to answer the question – whether we are alone in the space or not?

There the general rules of interpretation of the content of those pictograms. Were provided though those pictograms are located, on different continents, the content of them is similar. The pictograms produce the information about the expeditions carried out from the alien planet to our Earth thousands years ago. They reproduce the images of alien spaceships, artificial satellites, electromagnetic transmitters, exact coordinates of their stars, description of their home planet, spiral trajectories of their flight in the space etc. In the author's opinion the spiral type script existing on the Earth is based on the descriptions of spiral trajectories of the flight of alien's expeditions. The spiral-type pictograms are found in Peru, Mexico, Egypt, Greece, Georgia, North Caucasus...

In 1908, on the island Crete in Greece, during the archeological excavations near the town Phaistos was found the clay plate of disc shape. On the both sides of the disc is drawn the spiral and inside this spiral tape are placed pictograms. The spiral figures on the disc have attracted the author's attention and in his monograph "The Heaven Express" he has expressed the idea about the connection between the aliens who had visited the earth and the Phaistos disc. This idea is developed by the author in this book where he provides the full description of the Phaistos disc.
